# Example

Below are examples of how you might write your solution to a puzzle presented in the booklet. Or you might prefer to just solve them in your head – completely up to you!

**Q: Can you find checkmate in one for white?**

Here, because the solution is only one move, you might draw arrows on the board or you can use the lines below to answer – or both!

Rf6#  
.....  
.....

**Q: Can you find checkmate in two for white?**

Here, the solution is a bit (OK a lot!) trickier and requires consideration of multiple variations. If you are familiar with coordinates, it is probably best that you write your answer out as shown.

1.Qe1 e6 (1..c6 2.Qa5#) 2. Qh4#  
.....  
.....

# Deca

Attack both of the black pieces at the same time. This is known as a “Fork” in chess!

# Mega

White to play and win material. All of the combinations involve a “pin”. [Wikipedia definition](#)

# Giga

White to play and win material. Most of the puzzles involved a “pin” but one is based on a “fork”!

# Exa

In each diagram it is white to move and checkmate black in four moves (four moves for white, three for black). Exercise 3 is only three moves but we liked it so much we included it anyway!

# Fun Puzzles

Over the next couple of pages you will find some more casual puzzles with a range of difficulty levels!

## Triple Loyd - Medium

In a “Triple Loyd” puzzle you will notice the black king is missing from the board. You have to place the black king in 3 different positions (though sometimes the same square may be used twice)!

- 1) In the first position the black king is in checkmate
- 2) In the second position the black king is in stalemate
- 3) In the third position white can deliver checkmate in one move (and write down this move)!

# Bishop Maze in 13

Difficulty: Easier

In this bishop maze white has to move the bishop consecutively until it captures the black king. It is not allowed to capture any black pieces and cannot move to squares that are attacked by black pieces. **The bishop can capture the king in 13 moves** – can you find your way through the maze?

# Help Mate!

PUZZLE  
OF THE  
WEEK

Difficulty: Hard

This puzzle is known as a 'helpmate'. **Black** has to make the worst possible move, helping white to deliver checkmate on his next move!

So where will black move, and what will be white's reply?

**Submit your solution for a chance to win a prize!**
