

DELANCEY
UK SCHOOLS
CHESS CHALLENGE

Activity Booklet
Saturday 14/11/2020

Introduction

The UKCC weekly activity booklet will be sent out every Saturday morning and contains chess puzzles and activities for a range of ability levels.

Players are encouraged to at least try and complete the page most relevant to their ability level (see table below). However you are welcome to tackle the entire booklet! At the end of the booklet there are some more general puzzles / activities for everyone to enjoy

Solutions

Solutions will be posted alongside the following weeks activity booklet and there will also be a video solution guide.

Please email us any feedback or ideas for future puzzles!

Ability Levels

Club	Description	Approximate ECF Grade *
DECA – Club	Complete beginners and those with an incomplete grasp of the rules	Ungraded
MEGA – Club	Know the rules but little grasp of planning what to do beyond capturing and quick checkmates. Little to no tournament experience	0 – 59
GIGA – Club	Players with some tournament experience looking to “level up”	60 – 99
TERA – Club	More experienced players who have won or placed highly in local competitions	100 – 129
EXA - Club	Very experienced players with success at National Level events	130 – 159

Example

Below are examples of how you might write your solution to a puzzle presented in the booklet. Or you might prefer to just solve them in your head – completely up to you!

Q: Can you find checkmate in one for white?

Here, because the solution is only one move, you might draw arrows on the board or you can use the lines below to answer – or both!

Rf6#
.....
.....

Q: Can you find checkmate in two for white?

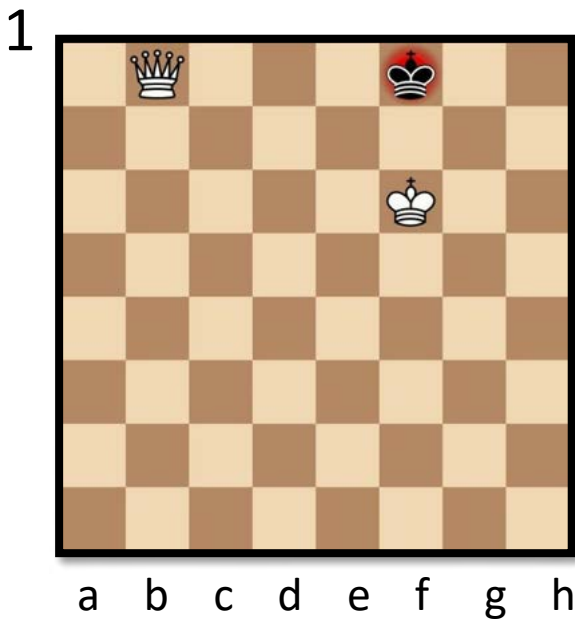

Here, the solution is a bit (OK a lot!) trickier and requires consideration of multiple variations. If you are familiar with coordinates, it is probably best that you write your answer out as shown.

1.Qe1 e6 (1..c6 2.Qa5#) 2. Qh4#
.....
.....

Deca

In these puzzles it is black to play. You have to determine whether it is checkmate, stalemate or neither!

Mega

Today we are focusing on pawn endgames. In each diagram it is white to move – you must determine what the correct result should be with best play (white win, black win or a draw). Try and write down your main variation as well.

Giga

Today we are focusing on pawn endgames. In each diagram it is white to move – you must determine what the correct result should be with best play (white win, black win or a draw). Try and write down your main variation as well.

Tera

Today we are focusing on pawn endgames. In each diagram it is white to move – you must determine what the correct result should be with best play (white win, black win or a draw). Try and write down your main variation as well.

Triple Loyd

Difficulty: Easier

In a “Triple Loyd” puzzle you will notice the black king is missing from the board. You have to place the black king in 3 different positions.

- 1) In the first position the black king is in checkmate
- 2) In the second position the black king is in stalemate
- 3) In the third position white can deliver checkmate in one move (and write down this move)!

Help Mate in One

Difficulty: Medium

This puzzle is known as a 'helpmate'. **Black** has to make the worst possible move, helping white to deliver checkmate on his next move!

So where will black move, and what will be white's reply?

Mate in 2 - Lying in Wait

PUZZLE
OF THE
WEEK

Difficulty: Medium

The challenge here is to find mate in two moves for white! White plays first, black replies and then white checkmates with their 2nd move.

Submit your solution for a chance to win a prize!

Submit your answer via the form below:

<https://airtable.com/shrVsrBdsSWPRRDVK>

Correct answers will have a shot of winning a prize! Previous prizes include merchandise and invitations to master challenge matches
